Mrs. Blue Jay collected three thousand and ten bugs for her babies to eat. She has three babies. How many bugs does each baby get if they each are given the most amount they can get? Mrs. Blue Jay gets the remainder, how many bugs will she get?

**3,010 ÷ 3 = 1,003 r 1 – The babies get 1,003 bugs each and Mrs. Blue Jay gets one. (Such a raw deal for mommy!)**
